

In this exercise you will write prompts to resolve some use cases in Technology Delivery Life Cycle.

1. Use ChatGPT (<https://chat.openai.com/>) with your personal login (same login that you used for Level 1 training) to get response. Don't use Accenture enterprise ID and credentials.
2. Strictly follow the instructions given in this user guide. Don't upload any of the client code, client information/data, Accenture information/data into ChatGPT application.
3. Fine tune prompt if you don't get the right result.

Use Case Scenarios

Scenario 1: AMS/IMS: Service Desk Call Summarization

Accenture provides level 1, 2 and 3 support for 40 applications for large Telecom client. 60% of applications are built on SAP platform. Rest are built on Java, .NET and React Js. 20% of calls taken by L1 team are resolved by referring SOPs. For remaining 80% calls are raised as ticket for L2 team. While raising ticket L1 team copy pastes the entire conversation transcribe as description. L2 team takes time and struggles to summarize the entire conversation and understand the exact issue. Below is description of a ticket. Write prompt to summarize the description into a template. Provide a template (e.g. list of fields: like Issue, Application Name, Business Impact, etc.)

Ticket Description:

SDA: Hello, thank you for calling the IT Service Desk. My name is Alex. How can I assist you today?

BU: Hi Alex, this is Sarah from the Finance team. I'm having trouble processing invoice.

SDA: I'm sorry to hear that, Sarah. Let's see if we can get this sorted out. Have you encountered any error messages, or is there a specific issue you're facing?

BU: Yes, I'm getting an error message that says, "Error Code: F5 123, Description: "Document date in the past. Please enter a valid document date."

SDA: I see. It sounds like there might be an issue in the invoice payment date. Can you confirm if you're using the correct date format for the Invoice payment?

BU: Yes, I checked all details. Everything looks fine.

SDA: I understand you are using myInvoice application.

BU: Yes.

SDA: Got it. Let me check from my end. While I'm doing that, could you please try checking with colleagues if they are also facing same issue?

BU: Sure, let me try that... Oh, my colleague also is facing the same issue.

SDA: Thank you for checking that, Sarah. It appears to be a common issue in the application, not specific to your Invoice. Can you let me know how many business users like you would be there now in the application?

BU: Around 150.

SDA: Thanks for providing that detail. Are all of them from North America or other Geographies also?

BU: Users across the globe.

SDA: Oh..okay. let me raise a P1 incident for our technical team to check on this. Is there anything else I can help you with, or any other issues you're experiencing?

BU: No, that's it for now. I need a resolution immediately for this. Otherwise, payment will be delayed to Vendor that will delay the receipt of material!

SDA: I understand, Sarah. I will get back to you shortly. Have a great day!

Instruction:

1. Write prompt to summarize the above ticket description.
 - a. Provide the description (the above conversation text) as part of prompt
 - b. Provide the template below for summarization in the prompt.
 - i. Issue Description:
 - ii. Business Impact:
 - iii. Application Name:
2. Fine tune the prompt to obtain the right output (example output shown below)

Issue Description:

Users are receiving an error message "Error Code: F5 123, Description: Document date in the past. Please enter a valid document date" when processing invoices.

Business Impact:

Payment delays to vendors, which could delay the receipt of materials.

Application Name:

myInvoice

-
3. Take screenshot of the outcome in ChatGPT and upload it on the portal

 Provide a screenshot of the lab assignment output, following these [instructions](#)

Choose a file or drag & drop it here

JPEG, PNG format, up to 5 MB

[+ Browse File](#)

Scenario 2: SI/AD User Story Generation

Bank XYZ wants to develop a new application to handle Payment processing, where there will be login screen, ability to select target account, select medium of payment and obtain payment confirmation. Write prompt to generate user stories that will cover functional and non-functional user stories. List them in functional area wise.

Instruction:

1. Write prompt to generate user stories.
2. Provide all the context in the prompt to create wholistic set of user stories.
3. Complete the prompt to list the user stories functional area wise.
4. A sample output is shown below. Fine tune prompt to achieve a similar result.

Functional User Stories

User Authentication

1. User Login:
 - As a user, I want to log in using my username and password so that I can access my account securely.
 - As a user, I want to reset my password if I forget it so that I can regain access to my account.
2. Two-Factor Authentication:
 - As a user, I want to enable two-factor authentication for my account so that I have an extra layer of security.

Account Management

3. View Accounts:
 - As a user, I want to see a list of my accounts so that I can choose which one to use or payments.
4. Select Target Account:
 - As a user, I want to select the target account for payment so that I can specify where my payment should be sent.

Payment Processing

5. Select Payment Method:
 - As a user, I want to choose a payment method (e.g., credit card, bank transfer, digital wallet) so that I can make a payment using my preferred method.
6. Enter Payment Details:
 - As a user, I want to enter the payment amount and any necessary details so that I can complete the payment transaction.
7. Review Payment:
 - As a user, I want to review the payment details before confirming so that I can ensure all information is correct.
8. Confirm Payment:
 - As a user, I want to confirm the payment after reviewing so that the transaction can be processed.
9. Payment Confirmation:
 - As a user, I want to receive a confirmation of my payment so that I know the transaction was successful.
10. Payment History:
 - As a user, I want to view my payment history so that I can keep track of all my transactions.

Notifications

11. Payment Alerts:
 - As a user, I want to receive notifications for successful and failed payments so that I am aware of the status of my transactions.
12. Account Activity Alerts:
 - As a user, I want to receive alerts for any suspicious activity on my account so that I can take action quickly.

Non-Functional User Stories

Security

13. Data Encryption:
 - As a user, I want my data to be encrypted during transmission so that it is protected from unauthorized access.
14. Secure Storage:

- As a user, I want my sensitive information to be securely stored so that it cannot be accessed by unauthorized parties.

Performance

15. Fast Payment Processing:

- As a user, I want payments to be processed quickly so that I do not have to wait long for transaction completion.

16. High Availability:

- As a user, I want the application to be available 24/7 so that I can make payments at any time.

Usability

17. User-Friendly Interface:

- As a user, I want the application to have an intuitive and easy-to-use interface so that I can navigate it without difficulty.

18. Responsive Design:

- As a user, I want the application to be accessible on various devices (e.g., desktop, mobile) so that I can use it conveniently.

Reliability

19. Error Handling:

- As a user, I want the application to handle errors gracefully so that I receive meaningful feedback and can take corrective actions.

20. Backup and Recovery:

- As a user, I want my payment data to be backed up regularly so that it can be recovered in case of any data loss.

Compliance

21. Regulatory Compliance:

- As a user, I want the application to comply with relevant financial regulations so that my transactions are legally compliant.
